- Effective Communication

PROFILE

I'm a motivated BCA student passionate about DevOps, full-stack development, and cybersecurity. I'm skilled in building responsive web apps, managing WordPress, and exploring secure deployment workflows. Known for quick learning, critical thinking, and leadership through team projects and tech initiatives, I aim to grow in innovative, fast-paced tech environments.

EXPERIENCES

Project Experiences

- Created BCAPoint, a WordPress-based platform dedicated to supporting BCA students by providing educational resources and community engagement.
- Developed a ride-sharing web app featuring OTP-based ride verification and real-time location tracking using Django.
- Built an e-commerce store with full frontend and backend integration to facilitate seamless online shopping experiences.

Leadership Experiences

- Served as Secretary of the BCA Association - MMC, supporting the organization of faculty-led programs and student-focused academic initiatives.
- Involved with Team Mechi Bandits, contributing actively to project coordination and collaborative development efforts.
